- Research interpretation

Experience

08.2020 – 08.2022

Agricultural Engineer / Al Tammam Agricultural Company, Jordan

- Breed, raise and day to day care on cattle like Al Naimi sheep, cows, and camels.
- Assessment of animal populations and their production environments to establish their status and identify strengths that can be enhanced and weaknesses that need to be overcome, like genetic improvement program.
- Conservation of animal genetic resources including taking measures to prevent the loss of genetic diversity in animal populations to protect breeds from extinction.
- Genetic improvement & animal breeding by selecting genetically superior animals to be the parents of the next generation, such as fertility, disease resistance or longevity that relate to costs of production, to produce offspring with favorable traits and characteristics.
- Examined animals to detect symptoms of illnesses or injuries and administered medications and vaccines to protect animals from diseases.
- Keeping various records on animals like feeding, vaccination, and other data.
- Assisted in the delivery of newborn animals.
- Supervised workers who feed, water, and otherwise care for animals, and clean houses, pens, feeders, waterers, rooms, and sheds.
- Supervised the repair and painting of sheds, barns, and fences, and milling, loading, and unloading of feed.
- Improved the quality and safety of agricultural commodities by investigating the properties of feed that impact those characteristics.

09.2017 – 07.2020

Plant Farm Manager / Private Plants Farm, Jordan

- Designed and acquired required test equipment/fixtures from vendors and conducted product evaluations.
- Assist installation of the machinery. Train other employees on the proper use of the machinery.
- Administration of workers and overall management of large farm. Assured machinery operates efficiently, conduct repairs and regular maintenance as equipment requires.
- Utilized cheaper and more cost-effective irrigation systems.
- Developed guidelines for the use of agricultural chemicals and monitored and reviewed agricultural practices.
- oversaw the construction of agricultural infrastructure and the maintenance of existing infrastructure including the installation of irrigation and drainage systems.
